

Dear Sirs: I am writing to protect my rights to access ALL the satellite radio networks programming; ie. XM Instant Traffic & Weather. I believe it is a violation of my First Amendment right for you to interfere with satellite radio.

Shouldn't your time be better spent by looking into the "Family Hour?" That was such a major concern in the past; whatever happened to it?

I saw 20/20 on May 27th. The show was dedicated to the pornography industry going mainstream, it mentioned the big corporations that profit by it. Who are your contributors?

Mike Keely
